FEATURES
- 1.0-8.0 GHz Frequency Coverage
- 4 Stage Version
- Excellent Linearity
- Miniature Size

DESCRIPTION
The MICRO LAMBDA MLFI-Series of Miniature YIG filters cover the frequency range of 1 GHz to 8 GHz and are available with 20 MHz minimum 3 dB bandwidths. They provide excellent linearity, low insertion loss and flat response over the frequency range. These filters offer the user the ability to reduce the size of current system designs as well as next generation system designs. This miniature line of filters are ideal for use in portable test sets, VXI base instruments, miniature receivers, and small microwave test equipment applications.
